The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have decreased in size by 1% which may affect appearance in older projects. The stylistic alternates and historical alternates features (cool alternate g) have been updated so you can access it in more applications such as InDesign under Stylistic Set #1 and Stylistic Set #2. Inverted question and exclamation marks have been lowered. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. The space between double quotes and guillemots has been reduced.	2021-06-18
<b>Octin</b>	1.205	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F.	2021-06-18
<b>Gomoku</b>	2.004	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have decreased in size by 3% which may affect appearance in older projects. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications. Katakana and Hiragana characters remain but the encoding is no longer declared—Japanese characters will still function but it the fonts won't show up in your application's menu as a Japanese font.	2021-06-18
<b>Battlemaze</b>	1.102	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The fi and fl ligatures were superfluous and have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer.	2021-06-18
<b>Zamora</b>	2.107	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Added single guillemots. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-18

<b>Otoboke</b>	1.106	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. The original design was intended to simulate an ink/paper bleed effect. The detailed fuzzy line effect didn't convey that properly, so it has been rendered in crisp style that looks more like ink saturation on a harder substrate.	2021-06-18
<b>Bonobo</b>	2.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Reagan</b>	2.005	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. Inverted question and exclamation marks have been lowered. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by 4% which may affect appearance in older projects.	2021-06-18
<b>Maqui</b>	1.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. The fi and fl ligatures were superfluous and have been removed. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications. Inverted question and exclamation marks have been lowered.	2021-06-18
<b>Marianas</b>	2.002	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by 12% which may affect appearance in older projects. Redesigned ogonek. Fixed overlap issue on \$.	2021-06-18
<b>Stud</b>	1.105	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Arrows have been moved to correct Unicode locations: 2090 and 2192. Printer's fists (pointing fingers) have been moved to correct Unicode locations: 261C and 261E. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Chilopod</b>	3.011	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. The stylistic alternates feature (alternative E) has been updated so you can access it in more applications such as InDesign under Stylistic Set #1. The alternative E now included accented versions. Kerning has been adjusted. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by 9% which may affect appearance in older projects.	2021-06-18

<b>Sheaff</b>	2.102	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer.	2021-06-18
<b>Skygirls</b>	1.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Xenu</b>	1.204	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-18
<b>Zupiter</b>	3.107	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Heroid</b>	2.202	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Hayate</b>	1.204	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The fi and fl ligatures were superfluous and have been removed. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Clipwave</b>	1.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. The fi and fl ligatures were superfluous and have been removed. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18

<b>Enamel Brush</b>	2.005	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by 7% which may affect appearance in older projects. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Bomr</b>	3.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-18
<b>Ulian</b>	4.008	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have been reduced in size by 6% which may affect appearance in older projects. Inverted question and exclamation marks have been lowered. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Threefortysixbar rel</b>	1.106	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Outlines have been refined in the Regular style; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Winthorpe</b>	1.412	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. The fi and fl ligatures in the small caps styles were superfluous and have been removed. The micro/mu ( $\mu$ ) symbol has been redesigned. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer—not available in small caps styles. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. Reversed quotation marks have been added at Unicode 201B & 201F. Quotes kerning issue has been resolved for small caps. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-18
<b>Rexlia</b>	1.105	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. The stylistic alternates feature (alternative A) has been updated so you can access it in more applications such as InDesign under Stylistic Set #1. Alternative A accented characters have been added.	2021-06-25

<b>Angostura</b>	2.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. The fi and fl ligatures were superfluous and have been removed. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-25
<b>Conceal</b>	1.105	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-25
<b>Shnixgun</b>	1.204	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Horizontal bar (longer than em dash) has been moved to Unicode 2015. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-25
<b>Lerku</b>	2.107	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-25
<b>Domyouji</b>	1.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F.	2021-06-25
<b>Charbroiled</b>	2.108	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The stylistic alternates feature (alternative e, o, and s) has been updated so you can access it in more applications such as InDesign under Stylistic Set #1. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-25
<b>Restore</b>	1.105	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F.	2021-06-25
<b>Llandru</b>	2.102	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The stylistic alternates feature has been updated so you can access it in more applications such as InDesign under Stylistic Set #1. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. The ellipsis character (...) was far too wide and has been changed to a more reasonable width.	2021-06-25
<b>Zosma</b>	3.008	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by 5% which may affect appearance in older projects. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer.	2021-06-25

<b>Vigo</b>	2.104	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. The stylistic alternates feature (single story a) has been updated so you can access it in more applications such as InDesign under Stylistic Set #1. Alternate accented a characters have been added. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-25
<b>Burnaby Stencil</b>	1.106	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-25
<b>Boopee</b>	2.107	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was far too wide and has been changed to a more reasonable width. An inconsistency between the width of the space character and the non-breaking space character has been repaired. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-25
<b>Polarband</b>	1.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. The fi and fl ligatures were superfluous and have been removed. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. An inconsistency between the width of the space character and the non-breaking space character has been repaired. Added weight to circumflex and caron accents.	2021-06-25
<b>Uniwers</b>	1.107	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. The stylistic alternates feature (alternative A, E and Y) has been updated so you can access it in more applications such as InDesign under Stylistic Set #1. Added accented versions of alternate A, E and Y characters. Added alternative Æ and œ characters. Fixed kerning on alternative A. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. The ellipsis character (...) was too wide and has been changed to a more reasonable width. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-25

<b>Mikadan</b>	3.008	Deprecated and obsolete characters such as L with dot and E with breve have been removed. OpenType alternates features have been updated so you can access them in more applications such as InDesign under Stylistic Sets #1, #2 and #3. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have decreased in size very slightly which may affect appearance in older projects.	2021-06-25
<b>Reversal</b>	1.107	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was too wide and has been changed to a more reasonable width. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-25
<b>Bristles</b>	1.107	Deprecated and obsolete characters such as L with dot and E with breve have been removed. An inconsistency between the width of the space character and the non-breaking space character has been repaired. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications.	2021-06-25
<b>Oxeran</b>	2.103	Deprecated and obsolete characters such as L with dot and E with breve have been removed. <b>Order</b>	3.006	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was too wide and has been changed to a more reasonable width. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by about 12% which may affect appearance in older projects. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications.	2021-06-25
<b>Jillican</b>	3.212	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The fi and fl ligatures were superfluous and have been removed. Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Accents on Jillican Wart 3D have had extensive cleanup.	2021-06-25

<b>Superclarendon</b>	2.105	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The fi and fl ligatures were superfluous and have been removed. Lowercase n with tilde was missing in one font. One font had a T with cedilla in place of T with comma accent. Bar character (   ) was missing in italic.	2021-06-25
<b>Bench Grinder</b>	1.203	Vertical metrics have been adjusted to improve cross-browser compatibility—no scaling was required so you should see no difference in Adobe applications. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. Deprecated and obsolete characters such as L with dot and E with breve have been removed. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. The ellipsis character (...) was too wide and has been changed to a more reasonable width.	2021-07-20
<b>Contour Generator</b>	4.108	Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. Deprecated and obsolete characters such as L with dot and E with breve have been removed. The ellipsis character (...) was too wide and has been changed to a more reasonable width. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. Tightened gap between double quotes.	2021-07-20
<b>Eden Mills</b>	4.108	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. Deprecated and obsolete characters such as L with dot and E with breve have been removed.	2021-07-20
<b>Horsepower</b>	5.005	An inconsistency between the width of the space character and the non-breaking space character has been repaired. The ellipsis character (...) was too wide and has been changed to a more reasonable width. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by 13% which may affect appearance in older projects. Kerning has been adjusted. More Latin-based languages are supported. Fractions have been added along with an OpenType fraction feature. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. More monetary symbols have been added. Accents have been adjusted for better balance. Uppercase accents have a lower profile.	2021-07-20
<b>Hydrogen Whiskey</b>	5.011	Scaled mathematical symbols down. Added brackets and angle brackets. Greater than and less than symbols were pentagonal arrow—they've been replaced with the correct symbols and moved to the Unicode arrows locations 2190 and 2192. Kerning has been adjusted. Opentype fractions feature added. Added currency symbols, reverse quotes and primes. Redesigned many characters. Added numeric ordinals.	2021-07-20
<b>Induction</b>	5.018	Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have decreased in size very slightly which may affect appearance in older projects. Alternate letters have been moved to OpenType Stylistic Alternates and Stylistic Set #1 and #2. Spacing and kerning has been replaced. Some characters have been redesigned. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks have added to Unicode 201B & 201F. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. Many monetary symbols have been added. Language coverage has been expanded. Diacritical marks (accents) have been redesigned. Combining (overlapping) accents have been added. Period and comma have been raised to the baseline except for "!" and "?".	2021-07-20

<b>Inflammable Age</b>	4.003	Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have increased in size by almost 8% which may affect appearance in older projects. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Spacing and kerning has been replaced. Some characters have been redesigned. Added OpenType fractions, numeric ordinals, math symbols and more language support. Some characters have had minor adjustments to stroke thickness. Mathematic characters have been redesigned.	2021-07-20
<b>Johnny Fever</b>	6.101	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F.	2021-07-20
<b>Korataki</b>	3.104	Deprecated and obsolete characters such as L with dot and E with breve have been removed. The stylistic alternates feature has been updated so you can access it in more applications such as InDesign under Stylistic Set #1. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. An inconsistency between the width of the space character and the non-breaking space character has been repaired. Added OpenType features for superior and inferior numerals. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. E with ogonek was missing in Bold. Minor kerning changes. Cyrillic style of А, а matches А, а. Ukrainian upturned Ghe І', і' added. More efficient kerning classes reduces file size and helps web fonts download faster.	2021-07-20
<b>Lady Starlight</b>	4.105	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. The space between guillemots has been reduced.	2021-07-20
<b>Monofonto</b>	4.102	Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033.	2021-07-20
<b>Pyrite</b>	5.102	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks are often referred to as painter's quotes—while they can be cute, they can cause havoc in some languages. They've been replaced with proper quotes. You can still access the old, reversed quotes as Unicode 201B & 201F. Fixed overlapping accent on ô.	2021-07-20
<b>Relish Gangler</b>	3.102	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F.	2021-07-20
<b>Saved by Zero</b>	4.104	Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer.	2021-07-20

<b>Senior Service</b>	5.008	Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have decreased in size by 5% which may affect appearance in older projects. All characters have refined outlines and new spacing. Alternate A, B, E and X have been removed from the capital locations to the Unicode Private Use Area. You access the alternates with the OpenType Stylistic Alternates feature of Stylistic Sets #1 and #2. Punctuation and mathematical symbols have been completely replaced. Accents have been redesigned and more languages are supported. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. Word space widened.	2021-07-20
<b>Should've Known</b>	5.108	Shaded version was pointless and has been discontinued. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. The ellipsis character (...) was too wide and has been changed to a more reasonable width. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have decreased in size by 5% which may affect appearance in older projects. Spacing and kerning has been replaced. Some characters have been redesigned. Added OpenType fractions, numeric ordinals, math symbols and more language support.	2021-07-20
<b>Triac 71</b>	4.207	An inconsistency between the width of the space character and the non-breaking space character has been repaired. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. The fi and fl ligatures were superfluous and have been removed.	2021-07-20
<b>Y2K Bug</b>	4.003	A complete rebuild. All spacing and kerning has been replaced. Accents have been redesigned and languages expanded. Opentype fractions are now included. Current monetary symbols have been added.	2021-07-20
<b>Yonder Recoil</b>	4.103	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F. The space between double quotes has been reduced. Original 1997 versions of A, E, I, C, M, N, U, W, 7 & 1 are included as OpenType stylistic alternates or stylistic set #1—accented versions included. Deprecated and obsolete characters such as L with dot and E with breve have been removed.	2021-07-20
<b>Zero Hour</b>	4.103	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F.	2021-07-20
<b>Zorque</b>	4.102	The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Deprecated and obsolete characters such as L with dot and E with breve have been removed. Reversed left quotation marks have been flipped—the original reversed quotes are now at Unicode 201B & 201F.	2021-07-20
<b>Mikadan</b>	3.102	Kerning has been adjusted. The design of the left quotation marks has been changed. Combining accents have been added. More Cyrillic languages are supported. Some Cyrillic characters have been redesigned.	2021-08-22
<b>Scrubby</b>	2.103	The ellipsis character (...) was too wide and has been changed to a more reasonable width. The OpenType "swash" feature has been updated so they can now be accessed using OpenType stylistic set #1; this lets you access fancy overhanging versions of k, n, w, m, h, r, y and v. Alternate characters have now been assigned Private Use Area (PUA) Unicode values: this means the alternate characters will show up in a glyphs panel or character map so you can select them manually. To turn off the automatic substitutions, turn off your application's "ligatures" feature.	2021-08-27

## Dream Orphans

5.002 Added support for more Latin-based languages. Vertical metrics have been adjusted to improve cross-browser compatibility—the characters have decreased in size which may affect appearance in older projects. The OpenType fractions feature now supports long numerators and denominators such as 13/64, 199/200 or even longer. Primes, also known as foot and inch marks have been added at Unicode 2032 and 2033. Outlines have been refined; there were errors in some curves which may have caused minor graphic problems in some applications. Spurs were removed from T and thin horizontals have been slightly thickened in Regular and Italic. Spacing has been adjusted slightly. Kerning has been improved. 2021-10-01

## Knuckle Down

5.002 Capital letters have been added and some characters have been redesigned. Vertical metrics have been adjusted to improve cross-browser compatibility. Height of lowercase f has been raised to ascender height to avoid confusion with lowercase r...the original f is available as an OpenType stylistic alternate. Accents have been redesigned. Lowercase i and j dots have been raised. An OpenType fractions feature has been added. Spacing and kerning has been replaced. 2021-10-12
